

Background Echotexture

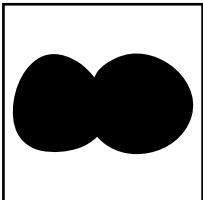

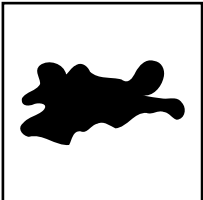

adipose fibro-glandular heterogeneous

Acoustic Posterior

round oval

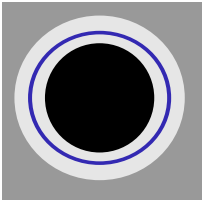

irregular lobular

Lesion Boundary

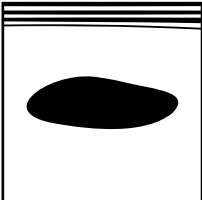

abrupt interface

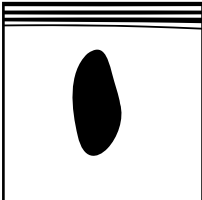

echogenic halo

Mass Orientation
based on skin layers

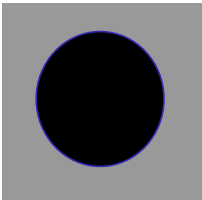

parallel

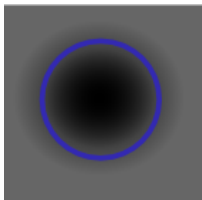

non-parallel

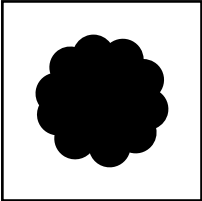

Mass Margin

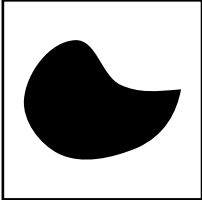

Circumscribed

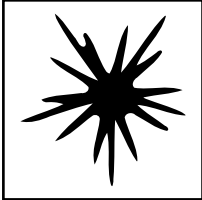

indistinct

micro-lobulated

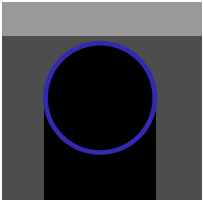

angular

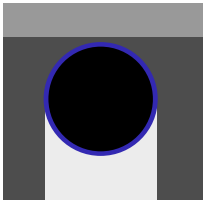

spiculated

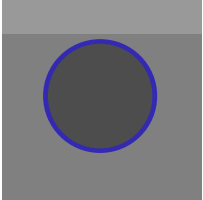

Mass Shape

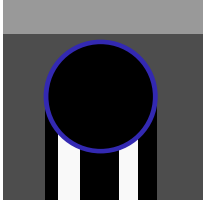

shadowing

enhancement

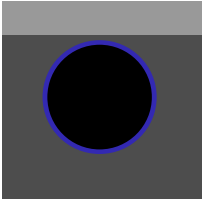

no-pattern

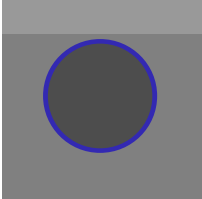

combined

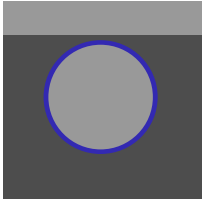

Echo Pattern

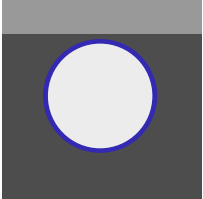

anechoic

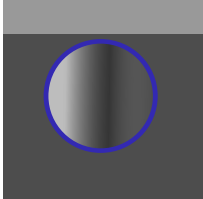

hypoechoic

isoechoic

hyperechoic

complex
